

Relative total AP residual at P1-P5 — Notebook 3 versus Notebook 5

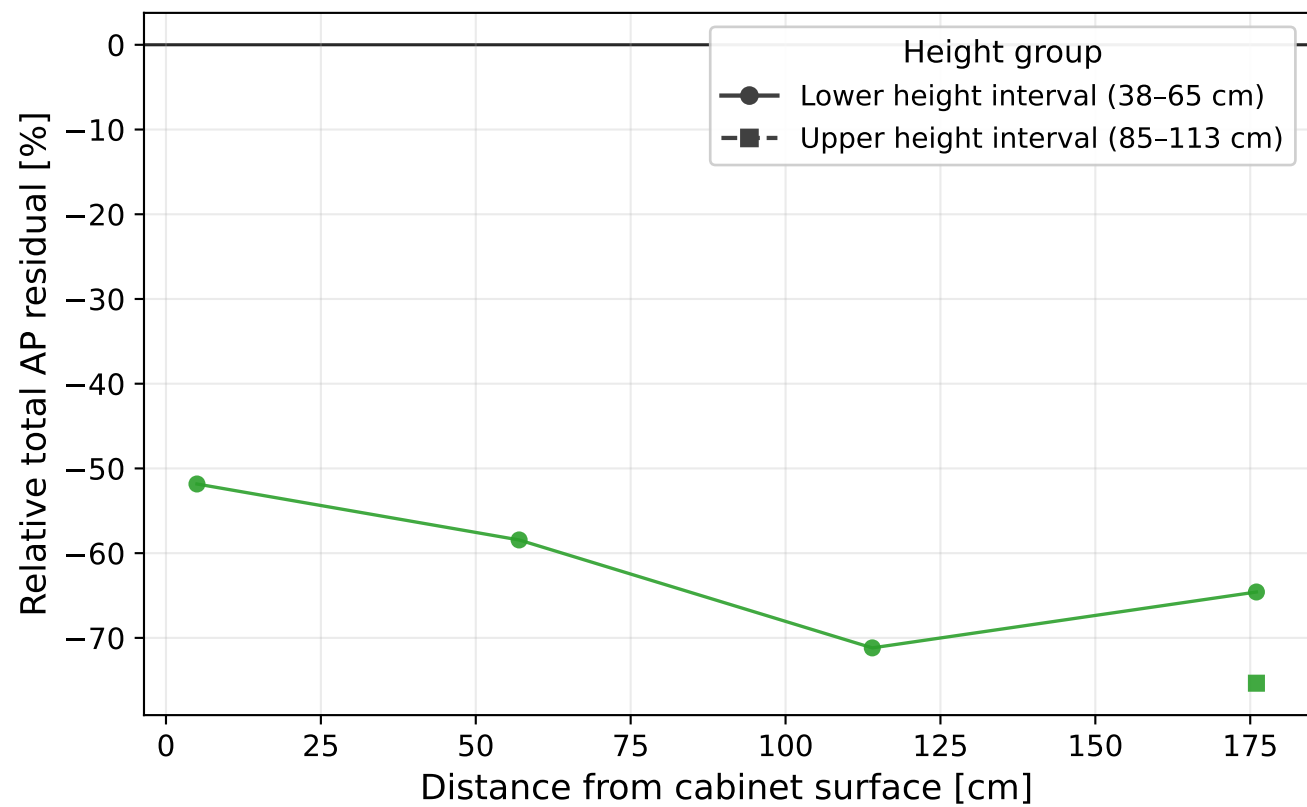

P1

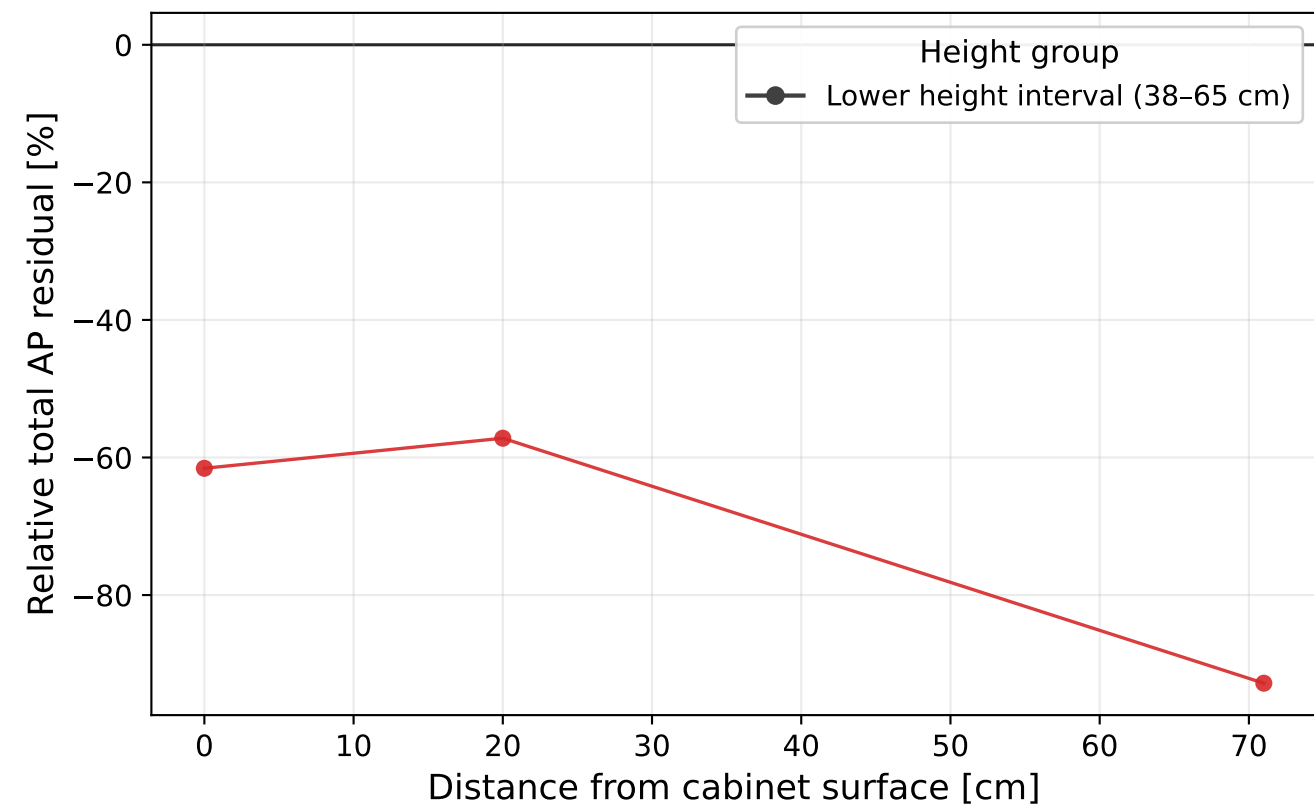

P2

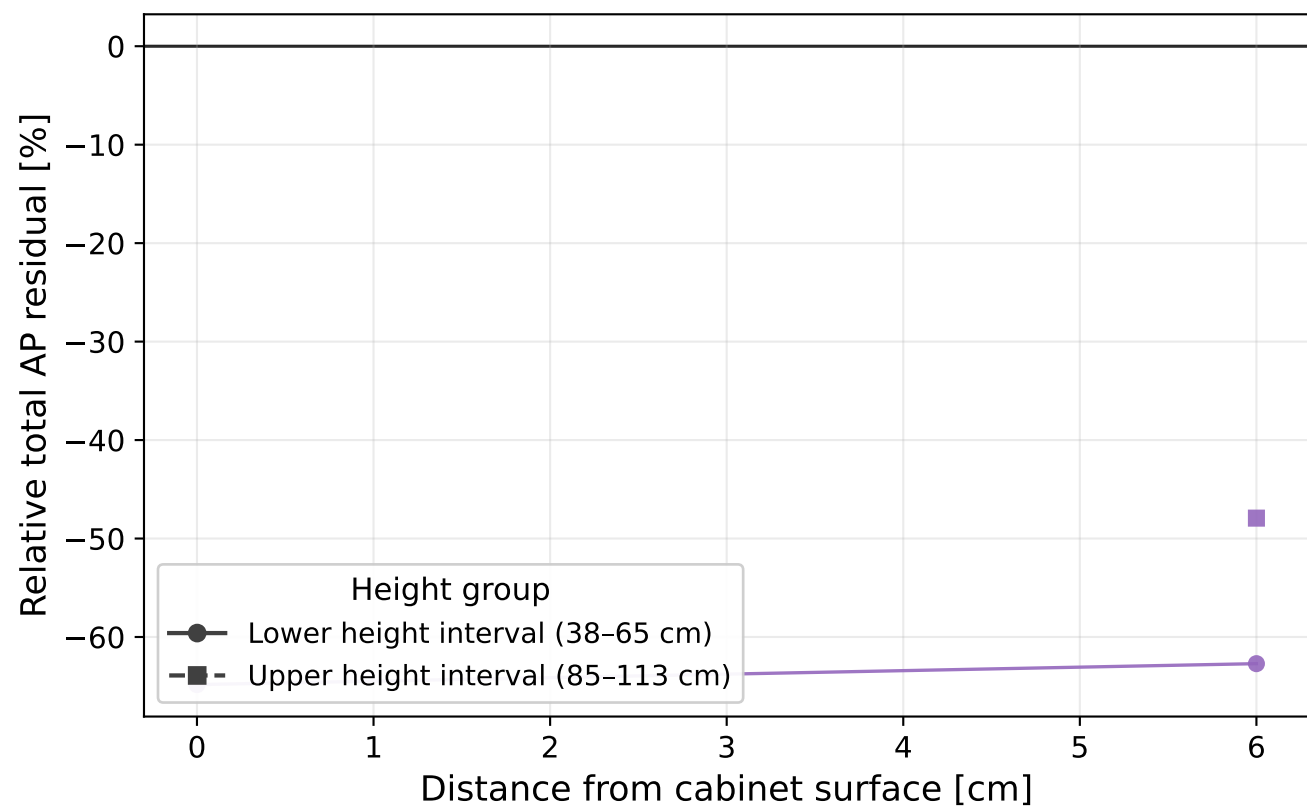

P3

P4

P5

Residual interpretation

— Zero line: Notebook 3 = Notebook 5
 Definition: $100 \times (\text{Notebook 3} - \text{Notebook 5}) / \text{Notebook 5}$
 Positive: Notebook 3 simulation is higher
 Negative: Notebook 5 estimate is higher
 Central-value diagnostic; not uncertainty-normalized
